

AirPlay is used when you want to mirror your computer or iPad to the computer that is hooked up to the projector. Up to 6 devices on the same Wifi can share their audio/visual stream simultaneously to a computer running AirServer.

1. Click on the AirPlay icon in the menu bar. Select the computer that is hooked up to the projector in your room.

2. You may need to enter a password the first time you connect to the AirServer computer, but it should remember you after that.

3. When you are done streaming your computer and want to return to normal, go to the AirPlay icon in the menu bar and Disconnect AirPlay Display.
